# Institutional Overview

## Geography and Populations Served

Established in 1967, Spokane Falls Community College (SFCC) is a public, comprehensive, two-year college covering 127 acres on its main campus. It is one of two institutions comprising Washington State Community College District 17, the State’s largest community college district geographically. The district is within a six-county, 12,302 square-mile region along the Washington-Idaho border. With its main campus, SFCC serves Spokane, an economically-challenged urban area of approximately 479,398 people, and with its Pullman campus, the more rural Whitman County. Some programs unique to SFCC in the Community Colleges of Spokane (CCS) District are offered in the more isolated counties of Ferry, Lincoln, Pend Oreille, and Stevens.

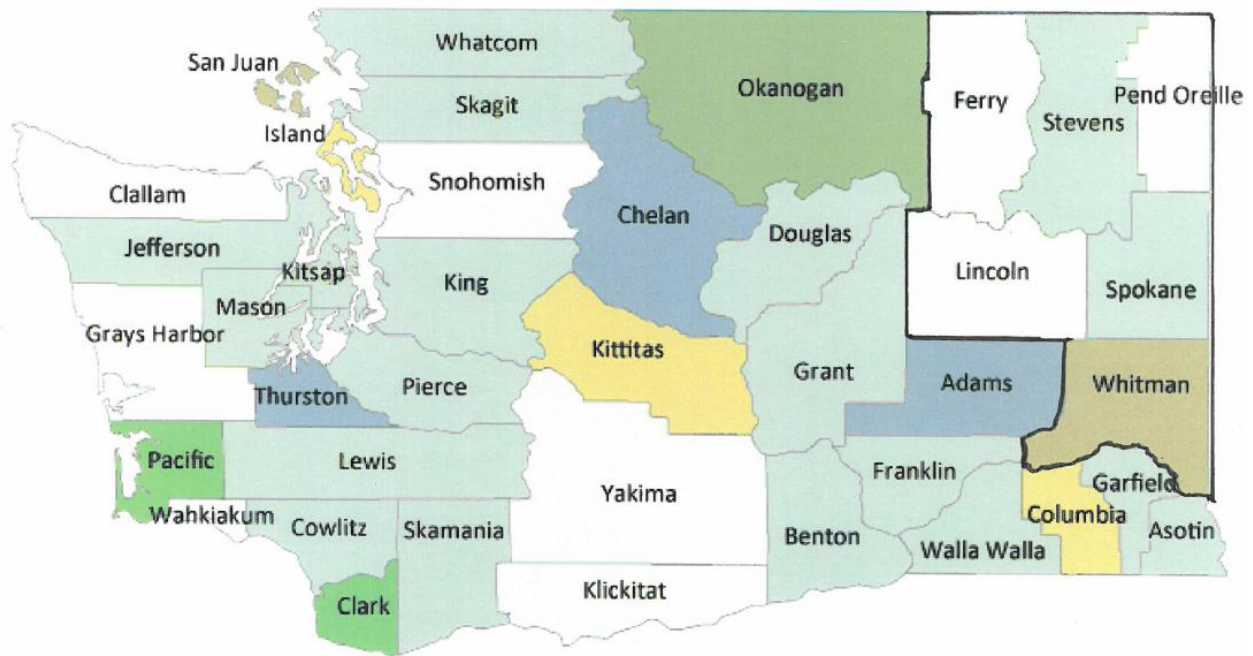

Figure 1.1: District 17: a six-county area comprised of both urban and rural populations

## Community Colleges of Spokane

The Community Colleges of Spokane (CCS) is composed of Spokane Community College (SCC), with its main campus located on the eastern side of the city of Spokane, and Spokane Falls Community College, located on the northwestern border of the city. The two separately accredited colleges within the Community Colleges of Spokane have different emphases.

The largest percentages of SFCC’s offerings are designed for student transfer to baccalaureate, degree-granting institutions. The State of Washington has statewide transfer agreements among all of the public and most of the private baccalaureate institutions. SFCC students benefit by having universities that honor these transfer degrees in the surrounding Spokane area including Eastern Washington

University, Gonzaga University, Washington State University, and Whitworth University. For SFCC students pursuing a baccalaureate degree entirely through e-learning, SFCC has an articulation agreement with the Western Governors University.

Although smaller in total enrollments than the transfer degree programs, the 20 SFCC career-technical programs work closely with advisory committees and area workforce councils, comprised of business and industry partners, in determining workforce needs. Educational modifications, if any, required meeting those needs are based on their input.

Unlike SFCC, the largest percentage of programs at Spokane Community College (SCC) is career/technical in nature and designed to place students directly into the job market. In 2012, the CCS Chancellor, Dr. Christine Johnson, recommended a merger between SCC and what had been a third institution of CCS, the Institute for Extended Learning (IEL). With the merger SCC obtained the adult basic education programs and senior programs that had been administered through the IEL, along with rural outreach to the northern three counties and Lincoln County. Previously in the northern counties, academic credits offered and degrees awarded through the IEL had been transcribed through SFCC, but those are now conducted through SCC with the merger.

The only part of the former IEL that was merged with SFCC was Whitman County with its Pullman, Washington campus. SFCC submitted a *Substantive Change Prospectus* in June 2014 and will complete all phases of the merger, integrating the Pullman campus into SFCC operations, during the 2014-2015 Academic Year.

## SFCC Leadership and Staff

Since July 1, 2012, Dr. Janet Gullickson has served as the SFCC President. Joining Dr. Gullickson on her executive cabinet is Dr. James Minkler, Vice President of Learning, who has served in that capacity for four years, and Dr. Darren Pitcher, Vice President of Student Services, who has completed his second year in that position. The SFCC President serves under the CCS Chancellor, Dr. Christine Johnson, who in turn reports to the CCS Board of Trustees whose members are appointed by the Governor for the State of Washington (see [organizational charts](#)).

The full-time faculty member headcount is 172, and part-time faculty is 295. The full-time equivalent faculty (FTEF) percentage is 56% full-time compared to 46% part-time. The staff numbers include 306 classified staff, 47 professional exempt staff and 24 administrators who, along with the faculty, comprise a total of 844 employees.

## Demographic Profile

The unduplicated headcount for the 2013-2014 academic year was 6,308 with 4,320 students (68.4%) enrolled full-time. The majority of SFCC students are female (57%), with 21 and under as the largest enrollment category by age. The average student age is 25.8. Thirty-eight percent (38%) of enrollees are first-time students, and the majority indicate they plan to attend long enough to complete a degree program and transfer to a baccalaureate institution. The students' academic intent falls into four main categories: 62.8% transfer, 25.9% workforce training, 1.2% basic skills training, and 10.1% other.

The College’s distribution of full-time equivalent students (FTES) by division is shown in the [Figure 1.2](#).

| Sum of State FTES  |                |                |                |                |
|--|----------------|----------------|----------------|----------------|
| Row Labels   | 2010-11        | 2011-12        | 2012-13        | 2013-14        |
| ⊕ Athletics, Physical Education                          | 331.4          | 302.6          | 279.4          | 262.8          |
| ⊕ Business, Professional Studies & Workforce Ed          | 568.6          | 544.2          | 513.8          | 492.5          |
| ⊕ Computing, Math, Science                               | 1,160.0        | 1,055.7        | 1,060.9        | 1,015.1        |
| ⊕ Humanities   | 1,062.8        | 1,018.0        | 965.9          | 928.3          |
| ⊕ Library  | 1.5            | 1.0            |                |                |
| ⊕ Non-Divisional   | 9.0            | 8.3            | 7.2            | 4.8            |
| ⊕ Social Science, Accounting, Economics & Human Services | 1,275.8        | 1,186.5        | 1,113.5        | 1,105.4        |
| ⊕ Visual and Performing Arts                             | 611.8          | 566.2          | 526.0          | 511.1          |
| <b>Grand Total</b>                                       | <b>5,020.9</b> | <b>4,682.4</b> | <b>4,466.7</b> | <b>4,320.1</b> |

Figure 1.2: SFCC FTE by Division over 4-Year Period

The racial and ethnic composition of SFCC students is largely homogeneous, though not as homogeneous as the service area. Compared to 85% of Spokane County residents identifying as Caucasian, that category represents 71.2% of the SFCC student population; the two largest non-White student populations are Hispanic, constituting 7.2%, and multiracial students, 6.4% (see [Appendix E](#) for more detailed demographic information).

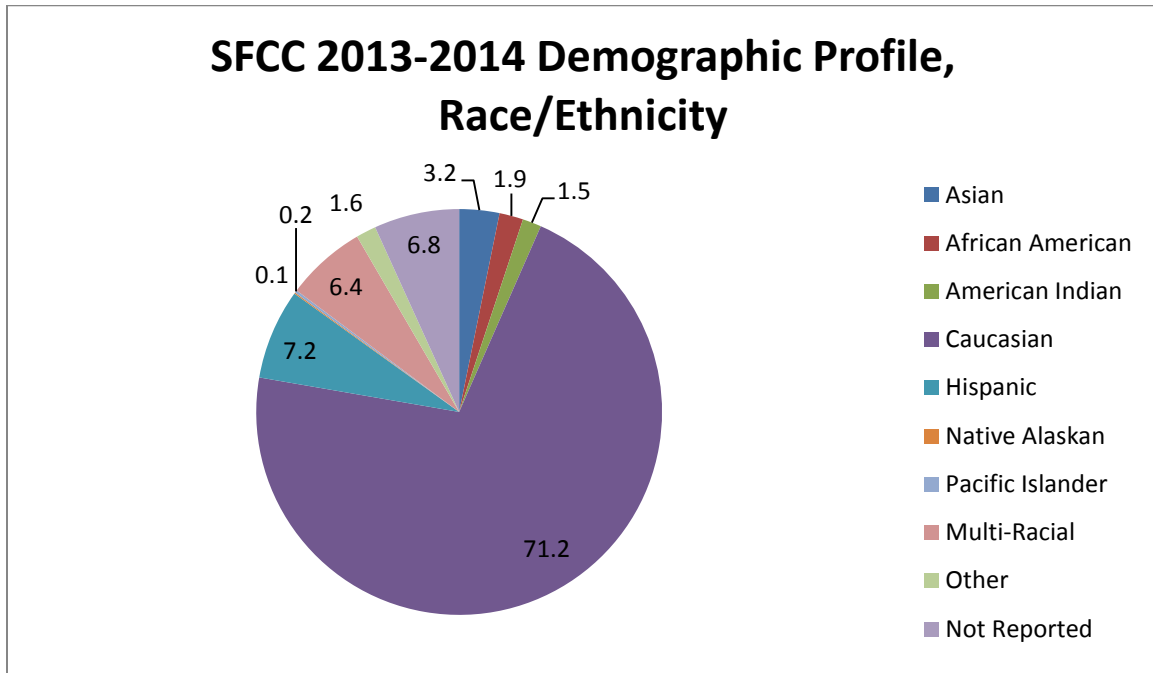

Figure 1.3: SFCC 2013-2014 Demographic Profile based on race and ethnicity.

## PREFACE

### Institutional Change

The College committed to increase satisfactory progression of students in their first year of college and to help improve the number who transition to the second year and successfully complete with certificates or degrees. This effort is partially sustained through grant funding, and SFCC is embarking on its fourth and final year of an Achieving the Dream grant. One outgrowth of the Achieving the Dream grant has been the development of a comprehensive academic advisement system that involves more instructional faculty in the advisement process, which used to be conducted primarily by counseling faculty. Early Alert is the other intervention supported by the Achieving the Dream grant. The result of these efforts and others surrounding student retention and completion are key indicators of the success of core theme objectives, measured through both quantitative means (Student Achievement Initiative points) and qualitative means (Community College Student Engagement Survey), providing the grist for continuous improvement.

The Community and Technical College System in Washington State (SBCTC) is updating its antiquated legacy administrative software system that has been in place since the early 1980's. In November 2014, Spokane Falls Community College, along with Spokane Community College and Tacoma Community College, is leading the way for Washington's 34 community and technical colleges by implementing the new PeopleSoft administrative software system called [ctcLink](#). The new system will offer a single, centralized system of integrated software tools for student enrollment and records management, academics, financial aid, budget, institutional research and data reporting, along with human resources and payroll functions. The changeover from the old system to the new has required considerable training and data conversion.

In August of 2014, the new LEED Silver SFCC Early Learning Center (ELC) opened for occupancy. The 15,242 square foot facility affords the previously cramped Head Start Program some desperately needed space in a more secure environment. The new facility's greater capacity allows the College to serve more student-parents by admitting additional children, from 92 in the old facility to 108 in the new, further providing student-parents access to college. The ELC program offers childcare for children ranging in ages three months to six years in a nurturing environment that encourages discovery, learning, and development for the children and their families.

**ELC Groundbreaking Ceremony June 2013**

SFCC has not experienced many organizational changes since the comprehensive visit in October 2013, except for the addition of an Assistant Dean of Instruction for the SFCC Pullman Campus and two changes in student services with a new Associate Dean for Student Transitions and a Director of Workforce Transitions (see [Appendix D](#) for [organizational charts](#)). With the addition of the Pullman campus to SFCC operations, the growth of concurrent enrollment programs with high schools such as

Gateway to College, Early College High School, and College in the High School, and the attempt to consolidate student support services for workforce students, these administrative positions were deemed important to accomplish this work.

A number of online degrees were developed and implemented during the 2013-2014 academic year and were reported and approved via a minor change request to the NWCCU. [Figure 1.4](#) represents the minor change requests for SFCC online degrees:

| ONLINE DEGREE                             | PROGRAM NAME                    | DATE SUBMITTED |
|---|---------------------------------|----------------|
| AA/Direct Transfer Agreement Degree       | Liberal Arts Transfer Degree    | 1/06/2014      |
| Business Direct Transfer Agreement Degree | Business Major Transfer Degree  | 1/06/2014      |
| AAS Degree/ Certificate                   | Early Childhood Education       | 1/26/2014      |
| AAS Degree/Certificate                    | Education Paraprofessional      | 1/26/2014      |
| AAS Degree                                | Gerontology Paraprofessional    | 1/26/2014      |
| AAS Degree/Certificate                    | Library and Information Systems | 1/26/2014      |
| AAS Degree                                | Social Services                 | 1/26/2014      |

**Figure 1.4: Fully online programs submitted to NWCCU during 2013-2014**

In a letter dated December 3, 2013, the NWCCU notified SFCC that the proposal submitted regarding a partnership with American Honors College was approved as a minor change. In the partnership, American Honors provides consultative training and technical assistance to the faculty who develop and teach hybrid honors courses. Faculty teaching honors courses are employees of SFCC and SCC, and honors courses are vetted through the normal procedures of the curriculum committees at both colleges. In addition, American Honors provides advising and transfer coaching for enrolled students. In approving the proposal, the NWCCU approval letter stipulates that the consultative partnership with American Honors is now included under the accreditations of SFCC and SCC.

The new AAS degree developed during the last academic year is the Business Technology and Software Specialist degree that will eventually be developed into a competency-based degree. At the time of this writing, the proposal is undergoing the thirty-day statewide review. Thus far, the first year of the two-year degree has been developed into the fully competency-based format and the full degree will be available for the 2015-2016 academic year.

Two statement-of-need proposals (*Forms A & B*) have been submitted to the Washington State Board for Community and Technical Colleges for the following two degree programs: Bachelors of Applied Science in Information Systems and Technology, and Bachelors of Applied Science in Applied Management. If these two need-proposals are approved by the SBCTC, the faculty will begin designing the curriculum to submit full proposals to the SBCTC. If approved by the SFCC Curriculum and Graduation Requirements Committee (CGRC), the SBCTC, and NWCCU as a substantive major change, student enrollments would begin in Fall Quarter 2015.

Eight degrees and certificates were terminated from the SFCC inventory in 2013-2014, due to the merger of the Institute for Extended Learning (IEL) with Spokane Community College.

| DEGREE/CERTIFICATE | PROGRAM NAME                             | DISCIPLINE OR PROGRAM AREA                       |
|--------------------|--|--|
| AAS                | Information Processing - IEL             | Computer applications at off-campus location     |
| Certificate        | Business Occupations - IEL               | Computer applications at off-campus location     |
| AAS                | Business, General - IEL                  | Business degree emphasis at off-campus locations |
| AAS                | Administrative Computer Specialist - IEL | Computer applications at off-campus locations    |
| Certificate        | Business and Software Applications - IEL | Computer applications at off-campus locations    |
| AAS                | Administrative Assistant - IEL           | Computer applications at off-campus locations    |
| Certificate        | Office Assistant - IEL                   | Computer applications at off-campus locations    |
| Certificate        | Management - IEL                         | Management courses at off-campus locations       |

**Figure 1.5: Terminated certificates and programs 2013-2014**

## Review of the Commendations and Recommendations Received from the Comprehensive Year Seven Visit

SFCC received four commendations as follows:

1. The evaluation committee commends the college trustees, faculty, staff, and administration, for their passion for student success, their activities focused on diversity, and their commitment to excellence in teaching and learning.
2. The evaluation committee commends Spokane Falls Community College for its success in integrating assessment into the culture of teaching and learning at the college. The structure which has been created to support assessment, specifically with regard to the roles played by Institutional Research, the Institutional Teaching and Learning Improvement Coordinating Committee (ITALIC), Curriculum Committee, and the Program Review Committee demonstrates the commitment SFCC has to measuring student learning.
3. The evaluation committee commends the college's CTE programs for their strong response to industry and community input. The CTE faculty and administration effectively use the input to guide curriculum and program development. Additionally, the teams have established meaningful and useful measurements of student achievement on both program and related instructional outcomes, and an annual program review plan that clearly informs departments and the college.
4. The evaluation committee commends the Associated Student Government for its ongoing support for campus safety, diversity awareness, and student support initiatives.

SFCC received five recommendations, as follows:

1. The evaluation committee recommends that the College articulate an acceptable threshold of mission fulfillment and ensure the effective measurement of core themes and that the core themes “individually manifest” and “collectively encompass” the College’s mission statement. Further the core theme objectives and verifiable indicators should be rigorous and meaningful, should align to evaluate the accomplishment of core themes, and should holistically inform evaluation of programs and services for each core theme objective (Standards 1.A.2, 1.B.2; 3.B.3; 4.A, and 4.B).
2. The evaluation committee recommends that the College revise its assessment of faculty evaluation and professional development to assure these processes provide ongoing systematic collection and analysis of meaningful, assessable, and verifiable data – quantitative and/or qualitative, as appropriate to its indicators of achievement – as the basis for evaluating the accomplishment of its core theme objectives (Standards 1.B.2; 3.B.3; 4.A.1, and 4.B.1).
3. The evaluation committee recommends that for each year of operation, the College undergo an external financial audit and that the results from such audits, including findings and management letter recommendations, be considered in a timely, appropriate, and comprehensive manner by the Board of Trustees (Eligibility Requirement 19 and Standard 2.F.7).
4. The evaluation committee recommends that the institution develop, implement, and regularly review a technology update and replacement plan to ensure its technological infrastructure is adequate to support its operations, programs, and services (Standard 2.G.8).
5. The evaluation committee recommends that the College move aggressively to revise and refine its system of direct and authentic assessment that appraises student accomplishment of general education outcomes from which are derived meaningful results that provide clear direction for curricular and instructional improvement (Standard 4.A.3, 4.A.6, 4.B.1, and 4.B.2).

Dated January 31, 2014, in a letter reaffirming SFCC’s accreditation, NWCCU stipulated that SFCC submit the following:

- An addendum to address Recommendations 1, 2, and 5, which should accompany the College’s 2014 Year One Mission and Core Themes Self-Evaluation Report.
- An Ad Hoc Report in Fall 2014 to address Recommendation 3, “which should be a separate and distinct report.”
- An addendum addressing Recommendation 4 in its Fall 2016 Mid-Cycle Self-Evaluation Report.

Recommendations 1, 2, 4, and 5 are areas where SFCC was found to be “substantially in compliance with Commission criteria for accreditation, but in need of improvement.” The addendum attached to this Year One Report will address Recommendations 1, 2, and 5.

With Recommendation 3 SFCC was found not to meet the Commission’s criteria for accreditation. The Commission requires SFCC to take appropriate action to ensure that Recommendation 3 is addressed and resolved within the prescribed two-year period as required by U.S. Department of Education Regulation 34 CFR 602.20 and Commission Policy, *Commission Action Regarding Institutional Compliance Within Specified Period*. An Ad Hoc Report will be sent separately addressing this recommendation and its resolution.

Although a report on Recommendation 4 is not due until 2016, the CCS Chief Information Officer has embarked on a comprehensive technology planning process which will ensure that SFCC's technological infrastructure adequately supports its operations, programs, and services. The following steps have already been taken:

1. A complete and accurate inventory of all Information Technology (IT) resources that make up the entire CCS technology infrastructure is underway and nearly complete;
2. A declaration of an acceptable useful life for those IT resources that make up the technology infrastructure and the determination of their current age are completed and founded on state and industry standards;
3. A sustainable budget for IT resources that make up the technology infrastructure to assure regular maintenance and renewal has been conceptualized; specific models and dollar estimates are being drafted for review;
4. An approved policy for IT resource implementation, maintenance, and renewal of IT equipment will take place, and procedures are currently being proposed;
5. A regular review of IT resources to assure adequacy and their ability to meet operation, program and service requirements is ongoing.
6. In sum, SFCC is pleased with its commendations and is working dutifully to plan and act on the recommendations that will surely further improve the college.

# Chapter One: Mission, Core Themes, and Expectations

## Executive Summary of Eligibility Requirements 2 and 3

### Eligibility Requirement 2: Authority

In accordance with *Eligibility Requirement 2*, SFCC is authorized to grant associate degrees and certificates under the Revised Code of Washington (see [RCW 28B.50.020](#)) which creates a system of community and technical colleges to provide for “the dramatically increasing number of students requiring high standards of education either as part of the continuing higher education program or for occupational education and training, or for basic skills and literacy education.” The divisions of college districts in the state of Washington, including District 17 (counties of Ferry, Lincoln, Pend Oreille, Spokane, Stevens, and Whitman) are listed under [RCW 28B.50.040](#). Community College districts operate under the supervision of the State Board for Community and Technical Colleges (see [RCW 28B.50.050](#)).

The Washington Administrative Code, [WAC 132Q-01-006](#), organizes the Washington State Community College District 17, Community Colleges of Spokane (CCS), including Spokane Community College and Spokane Falls Community College, under Title 28B RCW as a public institution of higher education. The governor appoints the five-member board of trustees who oversees administration, strategic planning, and policy development.

### Eligibility Requirement 3: Mission and Core Themes

SFCC’s mission and core themes are consistent with the College’s legal authorization and are appropriate for a degree-granting institution of higher learning. The College’s mission statement was revised during the 2013-2014 academic year and approved by the CCS Board of Trustees who also reaffirmed the College’s five core themes in June 2014. The core themes each manifest essential elements of the new mission and collectively encompass it.

## Standard One: Mission, Core Themes and Expectations

### 1. A Spokane Falls Community College Mission Statement

**Spokane Falls Community College meets the needs of our community by advancing student achievement through quality, accessible learning opportunities that embrace diversity, promote equity and foster global awareness** (approved by the CCS Board of Trustees, June 17, 2014).

The mission statement was last revised during the 2007-2008 academic year and approved by the CCS Board of Trustees in 2008. The College tied its 2008-2013 strategic plan to that mission statement: “SFCC fosters student achievement and scholarship by providing high quality, affordable, and accessible learning opportunities.” In the Northwest Commission on Colleges and Universities’ (NWCCU) evaluation of the SFCC Year One Accreditation Report, dated October 2011, the College was advised to review the mission and, if deemed appropriate, to revise it. During the NWCCU Comprehensive Seven Year Evaluation Visit in October 2013, evaluators had difficulty seeing where the five core themes were reflected in the mission statement.

As a result, during the 2013-2014 academic year, SFCC engaged in a process, led by President Janet Gullickson and the Institutional Effectiveness Committee, to review its mission. The Institutional Effectiveness Committee, formerly named the Executive Accreditation Steering Committee, is comprised of faculty, staff and administrators. The committee drafted two statements after seeking the advice of the College's constituents. The college community was surveyed for feedback on the statements. The input was fairly extensive with some excellent suggestions that the Institutional Effectiveness Committee then synthesized, drafting the final version for Board of Trustee consideration which the CCS Board of Trustees approved at their June 2014 monthly meeting.

The Institutional Effectiveness Committee, in further conversations with various college-wide groups, reviewed and decided to retain the five core themes that the Board had previously approved in September 2011. At its June 2014 meeting, the CCS Board of Trustees reaffirmed those five core themes. As explained to the Board, fulfillment of the SFCC Mission depends on satisfactory accomplishment of the objectives set forth in the five core themes. [Figure 1.6](#) reflects the entire proposal that the CCS Board of Trustees approved and as it appears on [SFCC's website](#).

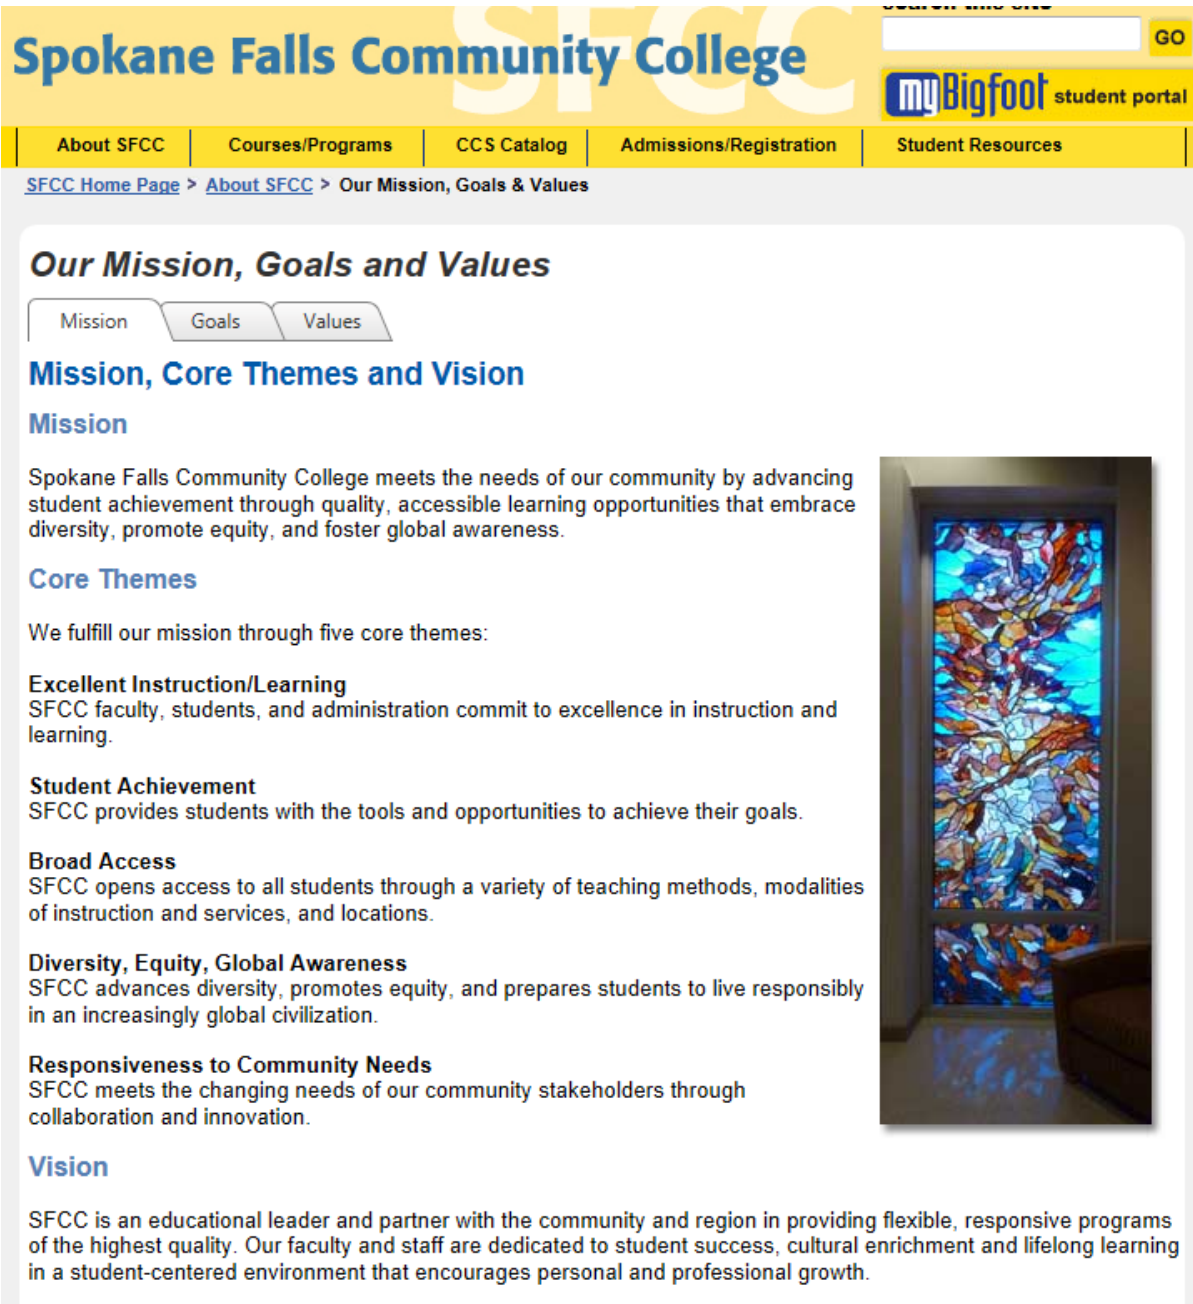

Figure 1.6: Mission and Core Themes on SFCC’s website

Posters of the new SFCC Mission Statement with the five core themes, and a separate one for the CCS District Strategic Plan, are displayed in classrooms and many meeting rooms throughout campus. The Mission Statement is also prominent on the College website and [CCS online catalog](#), as are the [SFCC Vision](#) and [Core Values](#). All curriculum proposals are required to address course learning outcomes, general education learning outcomes, if applicable, and core theme objectives, which are all related to the SFCC Mission Statement. Faculty development funding requests, marketing proposals and campus improvement requests must also address core theme objectives necessary for mission fulfillment. The President and other administrators frequently refer to the mission statement in meetings and public presentations.

## 1. A. 2 Mission Fulfillment and Threshold

The new SFCC Mission Statement clearly communicates the role and purpose that SFCC plays as a comprehensive community college serving Northeastern Washington while providing direction for the College's present and future efforts. Because strategic planning at all levels is tied to core theme objectives, which are tied to the mission statement, every department and program planning unit are now directly tied to mission fulfillment through the planning process. The process is connected to an annual college-wide review of the SFCC Strategic Plan by use of adopted software called Strategic Planning Online (SPOL), which also tracks progress toward fulfilling the CCS District strategic priorities. Additionally, SPOL aligns with the NWCCU accreditation standards, aiding SFCC in evaluating how well the assessed objectives are helping the College meet those standards.

The core theme objectives identify and define the institutional outcomes. These outcomes represent an acceptable threshold or extent of mission fulfillment. For outcomes to be meaningful and inform the continuous improvement process, they must represent the College's mission and have measurable indicators. The indicators should also be sufficient in number to cover all mission areas but not so overwhelming that the College loses sight of what is essential.

After reviewing the NWCCU evaluation reports from both the previous Year One Report and the Comprehensive Year Seven Report, the College has revised objectives to be more meaningful and focused on the essential core theme elements. In particular, the College has reduced the number of indicators so as to improve its focus on quality assessment and improvement.

A green/yellow/red scoring matrix is used to identify areas where the College exceeds an acceptable threshold, satisfactorily meets the threshold, or falls below a satisfactory threshold ([Figure 1.7](#)). As a unique community college with a unique mission, different values and different expectations are weighted differently for each objective necessary to accomplish mission fulfillment. The color indicators remain consistent for all indicators, but the narrative each core theme team writes for each objective will specifically address how the College will know when it exceeds, meets, or does not meet the necessary threshold. The measurement will be authentic, meaningful, informative, and actionable.

| Performance Threshold   |  |
|---|--|
|  | Results exceed target                              |
|  | Results are acceptable (near target )              |
|  | Results are below target and need immediate action |

**Figure 1.7: SFCC Scoring Matrix: green/yellow/red system**

Although one indicator of an objective might be in the red zone and suggest that immediate steps need to be taken to address the situation, it is only when the indicators, taken collectively, fall within the red zone that an objective itself is viewed as failing. If the objectives, taken collectively, fail to accomplish the core theme, then the core theme has a red zone indicator. To fulfill mission, all five core themes and the majority of their objectives must be at or exceeding acceptable levels. This holistic approach allows the College to concentrate attention on the areas of highest priority that are in most need.

SFCC articulates acceptable threshold of mission fulfillment in terms of the green/yellow/red dot system. The meaning of each dot is:

- Green – The mission is achieved
- Yellow – The mission is achieved at an acceptable threshold, with areas to improve
- Red – The mission is not achieved. Action plan(s) are needed, appropriate resources allocated.

## Section II: Core Themes

### 1.B.1

With the new mission statement as an outgrowth of what the College recognizes as key to its purpose, and with clearly recognizable core themes flowing out of the mission, SFCC starts the new seven-year cycle with a clearer sense of how the core themes individually manifest essential elements of the mission and that they do in fact collectively encompass the mission statement.

At its June 2014 monthly meeting, the CCS Board of Trustees reaffirmed SFCC's five core themes at the same time it approved SFCC's new mission statement:

- Excellent Instruction/Learning
- Student Achievement
- Broad Access
- Diversity, Equity, & Global Awareness
- Responsiveness to Community Needs.

Since SFCC is also a college within a district, it is incumbent upon the College to recognize and articulate how the College mission and its component core themes fit into the CCS District Strategic Initiatives. The connections among CCS Strategic Priorities, CCS Strategic Initiatives, and SFCC Core Themes are important in communicating to the CCS Chancellor and CCS Board of Trustees how SFCC, as one of two accredited colleges in the CCS District, helps CCS serve its vast service area and achieve its strategic priorities. The SFCC Mission Statement, through the alignment of its core themes with the [CCS District Strategic Priorities \(Figure 1.8\)](#), supports the [CCS Mission](#) which is as follows: "To develop human potential through quality, relevant, and affordable learning opportunities that result in improved social and economic wellbeing for our students and our state." The CCS Strategic Priorities are as follows:

- Student Success: Strengthening Engagement
- Collaboration and Communication: Building Productive Communities
- Sustainability: Enhancing Operational Efficiency and Effectiveness
- Innovation: Support a Culture of Continuous Improvement.

Figure 1.8: CCS Strategic Priorities and matching SFCC Core Theme Alignment

The SFCC core theme indicators and the results of the assessments, coupled with those of SCC, help the CCS District evaluate the degree to which the overall CCS Mission is fulfilled and identify areas where improvements are needed.

## 1. B. 2 CORE THEME OBJECTIVES

In response to Recommendation 1 indicating, among other things, that improvement is needed with regard to Standard 1.B.2, the core theme teams met to evaluate the objectives and indicators chosen for their core theme. Several questions were addressed:

- Is the objective truly an essential component of the core theme and mission fulfillment? If not, can the objective be eliminated?
- Do the indicators measure outcomes, not inputs?
- Does the measurement inform action plans in the process of continuous improvement?
- Do the indicators provide meaningful data that are consistently gathered, whereby the College can measure its own success against longitudinal benchmarks, as well as compare itself to others?
- Is it possible to lean the number of indicators to focus efforts on consistent, quality assessment and improvement planning?

By addressing these questions, the core theme teams collectively reduced the number of objectives from 15 to 12. The number of indicators was decreased from 50 to 23, with one of the indicators shared between two core themes. Many of the objectives were revised to better capture the essential elements of the core themes.

For some of the new and revised indicators, the gathering of data and its subsequent analysis are still too new to allow for thresholds to be set. All thresholds will be established by the end of the 2014-2015 academic year and fine tuning of the thresholds will be ongoing. At the date of this writing the scoring column of the template used in determining mission fulfillment has been left blank, but will be completed as part of the annual reporting process and color coded appropriately in regards to mission fulfillment and the continuous improvement cycle.

The Institutional Effectiveness Committee also approved revised core theme descriptions in order to ensure the language is more consistent with the new mission statement.

## Core Theme 1: Excellent Instruction/Learning

### Core Theme Description

SFCC faculty, students, and administration commit to excellence in instruction and learning.

| Objective 1.1: Students attain the learning outcomes for their courses and programs.  |  |   |  |        |
|---|--|---|--|--------|
| Indicators  | Evidence   | Actions   | Threshold  | Scores |
| 1.1.1 Career Technical Education (CTE) programs regularly verify that students attain their program learning outcomes.                      | Program Review   | Continue program review process   | All CTE program learning outcomes are assessed within a 3-year cycle.        |        |
| 1.1.2 Academic graduates achieve general education learning outcomes.   | ITALIC Rubrics   | Gen Ed Assessment Team to AACU workshop, lead Gen Ed revision through ITALIC 2014-2015  | TBD by ITALIC 2014-2015  |        |
| Objective 1.2: Faculty professional development results in improved teaching and learning.  |  |   |  |        |
| Indicators  | Evidence   | Actions   | Threshold  | Scores |
| 1.2.1 Professional development activities are reflected in classroom instruction and/or demonstration of how they benefit student learning. | ITALIC Rubrics, Student Achievement Initiative (SAI), Teaching Squares, Faculty evaluation | Professional development request forms revised, now require pre- and post-assessment of core theme achievement                    | 95%  |        |
| Objective 1.3: Faculty and administration develop courses and programs that align with academic disciplines and industry standards.         |  |   |  |        |
| Indicators  | Evidence   | Actions   | Threshold  | Scores |
| 1.3.1 Transfer information from baccalaureates show SFCC students perform at the same or better rates than other transfer students.         | Mutual Research Transcript Exchange (MRTE)   | Greater emphasis on degree completion; greater presence at transfer center assisting students, new reverse transfer articulations | Compare Eastern Washington University (EWU) Native Students to SFCC Students |        |
| 1.3.2 CTE graduates find employment.  | Economic Modeling Specialties, Inc. (EMSI), prof. licensure, Career Bridge State Data      | Continue program review process   | Maintain or improve beyond previous year benchmark                           |        |

Figure 1.9: Core Theme 1 Objectives and Indicators

## Narrative

SFCC's model for general education assessment has been reimagined and rebuilt in light of three of the NWCCU recommendations as well as research and participation in the Association of American Colleges and Universities' Institute on General Education and Assessment (Spring 2014). The developing model focuses on a few overarching general education outcomes rather than many distribution-based outcomes. In the new model, faculty development is included in the assessment process through developing signature assessments, norming and calibrating with rubrics, and faculty participation in the assessment process.

SFCC general education assessment provides direction for curricular and instructional improvement, directly connecting faculty development to student achievement. It also provides for a qualitative assessment of SFCC's Core Theme 1 Objectives 1.1 and 1.2.

The thresholds for Core Theme 1 indicators will continue to be reviewed. Some of the previous thresholds were based on indicators that measured inputs, not outputs. In refocusing the indicators, the College has reexamined what makes an indicator meaningful. Regarding Objective 1.3 for example, the College does expect and hold itself accountable to SFCC transfer students to do better than students from peer institutions once they transfer; thus indicator 1.3.1 is meaningful to the College. High employment rates for CTE students are necessary to justify the high costs of CTE programs; thus, indicator 1.3.2 is meaningful. Core Theme Team 1's goal is to have definite and clearly defined thresholds set for each indicator early on in the 2014-2015 academic year. The team will review more data and literature in order to establish realistic yet rigorous thresholds that will push the College to continually improve in achieving these targets.

The College sets aside significant funding for faculty development and therefore sets a fairly high expectation that most faculty professional development will result in evidence that there is a positive effect on teaching and learning. As a result of the [2013 Seven Year Comprehensive Evaluation Report](#), the College is now careful to document that evidence (see [Addendum](#) to this report addressing Recommendation 2).

## Core Theme 2: Student Achievement

### Core Theme Description

SFCC provides students with the tools and opportunities to achieve their goals.

| Objective 2. 1: Spokane Falls Community College provides functional, ongoing, and transitional support services.                              |   |  |  |        |
|---|---|--|--|--------|
| Indicators  | Evidence  | Actions  | Thresholds   | Scores |
| 2.1.1 SFCC will increase fall-to-fall persistence for degree-seeking students.  | SFCC Retention & Completion Report<br>SAI Retention points  | Academic Consulting Plan and training planned for September 8-9, 2014; revision to placement testing; revised counseling services, accelerated developmental math and English, revised math curriculum, implementation of full-scale tutoring center | 57% of degree-seeking students persist from fall-to-fall<br>SAI points same or better than previous year and peer institution cohort |        |
| 2.1.2 SFCC will increase the number and the rate at which students reach their 45 college-level credit points.                                | SAI   | Academic Consulting Plan and training workshops planned for September 8-9, 2014; revision to placement testing; revised counseling services  | SAI 13-14 report will be adjusted for merger of IEL/SCC<br>SAI points same or better than previous year and peer institution cohort  |        |
| 2.1.3 SFCC will increase the number and the rate at which students successfully transfer to Washington baccalaureate institutions as juniors. | MRTE  | Academic Consulting Plan and New Student Orientation emphasis on completing degree prior to transfer, reverse transfer agreements, Academic Consulting Plan and training planned for September 8-9, 2014, Partnerships with Universities             | 50% or better earn BA within 7 quarters, 45% or more of completed credits earned at SFCC   |        |
| Objective 2.2: Spokane Falls Community College supports students' academic progress toward degree completion.                                 |   |  |  |        |
| Indicators  | Evidence  | Actions  | Thresholds   | Scores |
| 2.2.1 SFCC will increase the number and the rate of student completions.  | SAI completion points<br>SFCC Retention & Completion Report | Campus priority, Strategic Initiative, Financial Aid strategy, Placement policy changes  | SAI points same or better than previous year and peer institution cohort   |        |
| 2.2.2 SFCC will reduce the number and the rate of students moving through A2 and A3 academic probation status.                                | SAI points  | Academic Consulting Plan and New Student Orientation emphasis on completing degree   | SAI points same or better than previous year and peer  |        |

|   |   |  |   |  |
|---|---|--|---|--|
|   |   | prior to transfer, reverse transfer agreements, Academic Consulting Plan and training planned for September 8-9, 2014                    | institution cohort  |  |
| 2.2.3 SFCC will increase the number and the rate of students reporting learning success as a result of participation in student support services. | Community College Survey of Student Engagement (CCSSE)<br>SSI | New Student Orientation, Peer Mentoring, Student Success Workshops, Testing Center, club participation, Food Bank, athletics, child care | Statistically significant increase for CCSSE results compared to self in previous survey, as good or better results compared to CCSSE peer institution cohort;<br>Statistically significant improvement in results of the SSI when compared to self in previous survey, as good or better results compared to SSI peer institution cohort |  |

**Figure 1.10: Core Theme 2 Objectives and Indicators**

### Narrative

Based upon feedback from the Year 7 accreditation team, Core Theme 2 Team realized its indicators were too numerous and disjointed. It also realized that indicators needed to transition from measures of student participation to tangible and measurable gains in student achievement as a result of targeted and innovative programs designed to support student achievement, success, and completion. A careful leaning of the indicators has been accomplished resulting in a more comprehensive slate of indicators that more appropriately measure achievement of Core Theme 2. The team has reframed its interpretation of Core Theme 2 by affirming what the Institution will hold itself accountable to do in support of Core Theme 2. Indicators show student achievement milestones and thresholds. Understanding that not all students will progress at the same rate, support programs are a necessary resource for students to utilize en route to achieving their academic goals. Therefore, the primary focus in regard to Core Theme 2 is student achievement accomplished through continuous improvement of student support services.

## Core Theme 3: Broad Access

### Core Theme Description

SFCC opens access to all students through a variety of teaching methods, modalities of instruction and services, and locations.

| <b>Objective 3.1: Spokane Falls Community College provides access to instruction, support services, and technological resources.</b>    |  |  |  |        |
|---|--|--|--|--------|
| Indicators  | Evidence   | Actions  | Thresholds   | Scores |
| 3.1.1 Academic success of students will be comparable regardless of teaching/learning/delivery methodology.                             | SAI, Student Course Outcomes Report (SCOR) & CCS e-Learning Reports, Student evaluations | Faculty training, workshops, & professional development opportunities to improve course design regardless of modality--such as eLearning Faculty Academy, Prior Learning Assessment (PLA) training, Competency-based training. Student training for online courses and use of technology | SAI points same or better than previous year and peer institution cohort, Statistically significant improvement in the baseline data of SCOR |        |
| 3.1.2 Students utilizing support services will be academically successful.  | Predictive Analytics Reporting (PAR)   | Utilize predictive analytics to assess intervention effectiveness for matching appropriate interventions to appropriate student populations and increase effectiveness   | This element of the analytics is still being developed in cooperation with Western Interstate Commission for Higher Education (WICHE)        |        |
| 3.1.3 Collaborate with community partners to provide multiple pathways to higher education for students of diverse abilities and needs. | Advisory Boards, Focus groups, Matriculation data  | Outreach to multiple populations such as K-12 students, aged-out foster youth, veterans, and participants of Workforce and career technical programs   | No significant achievement gap between students with diverse abilities and needs and general student population                              |        |

| Objective 3.2: Spokane Falls Community College cultivates strategies to reduce financial barriers that inhibit student success.    |                                       |  |  |        |
|--|---------------------------------------|--|--|--------|
| Indicators   | Evidence                              | Actions  | Thresholds   | Scores |
| 3.2.1 Academic success of incoming high school students will be comparable regardless of financial need and priority funding date. | Student Course Outcomes Report (SCOR) | A report is being built with the assistance of the Financial Aid office that will allow data to be gathered by need and funding date | No significant gap between students regardless of financial need and priority funding date |        |
| 3.2.2 Academic success of returning students will be comparable regardless of financial need and priority date.                    | Student Course Outcomes Report (SCOR) | A report is being built with the assistance of the Financial Aid office that will allow data to be gathered by need and funding date | No significant gap between students regardless of financial need and priority funding date |        |

**Figure 1.11: Core Theme 3 Objectives and Indicators**

## Narrative

Opening the door to higher education is not enough. Community colleges are tasked with offering programs, degrees, and/or certificates that provide access to a wide spectrum of diverse needs across the service area, both rural and metropolitan.

The objectives and supporting indicators in this core theme provide evidence that Spokane Falls Community College provides the community access to higher education. This is accomplished by offering programs and degrees in a variety of ways whereby students are able to enroll and complete their degree or certificate program while receiving the support they need to do so. Quantitative data provide information about the success of students served including progression and completion. The new use of data analytics will also provide quantitative data on the effectiveness of our alignment of student services with student needs and, ultimately, the effectiveness of those interventions. Additional analysis of qualitative data indicates students' satisfaction with course offerings, as well as the delivery methods used in making those programs accessible.

Working with our community partners and advisory boards to identify regional employment needs and career opportunities, SFCC strives to provide the education and support that will afford students access to these career pathways. Information gathered from Indicator 3.1.3 provides the College with the information it needs to continuously improve its service to students and employers in this regard.

The College will reach Objective 3.2 in at least two significant ways. The first is through the use of open educational resources, many of them developed by SFCC faculty members through a variety of grants or

independently; these help to negate the rising cost of higher education. The second way is that financial barriers will be reduced will be through ensuring that financial aid information is easily accessible to students. The cost of attending college presents a seemingly insurmountable barrier for many potential students. Financial aid, merit aid, and workforce funding allow many students to attend SFCC despite limited financial means. Measuring the impact of financial and scholarship aid shows the extent to which financial barriers to higher education are reduced.

Counting students involved in these diverse programs provides insight into the ways students not only utilize SFCC’s diverse educational offerings but also how successful they are in completing their academic goals. The indicators to the two objectives of the Broad Access Core Theme provide both quantitative and qualitative feedback to help programs and services improve their outcomes.

## Core Theme 4: Diversity, Equity, Global Awareness

### Core Theme Description

SFCC advances diversity, promotes equity, and prepares students to live responsibly in an increasingly global civilization.

| Objective 4.1: Spokane Falls Community College’s diverse students succeed. |  |   |  |       |
|--|--|---|--|-------|
| Indicators   | Evidence                               | Actions   | Threshold  | Score |
| 4.1.1 The gap in persistence rates among diverse students disappears.      | Retention and Completion Report        | Create an all-college Learning Community (year-long program) on white privilege, diversity, equity, made up of a speaker series and a workshop series<br><br>Institute mandatory tutoring or mentoring for students earning less than a 2.0 quarterly GPA | The gap is narrowing   |       |
| 4.1.2 The gap in completion rates among diverse students disappears.       | Retention and Completion Report<br>SAI | Create an all-college Learning Community (year-long program) on white privilege, diversity, equity, made up of a speaker series and a workshop series<br><br>Create set plans for completion for students in mentoring program                            | The gap is narrowing<br><br>SAI points same or better than previous year and peer institution cohort |       |

| Objective 4.2: Spokane Falls Community College fosters an inclusive, respectful, and equitable campus community.   |  |  |  |       |
|--|--|--|--|-------|
| Indicators   | Evidence   | Actions  | Threshold  | Score |
| 4.2.1 SFCC will increase the number and rate of students, faculty, staff, and administrators who perceive the SFCC environment as respectful, safe, and positive.                  | SFCC Employee Climate survey results<br>Student Satisfaction Inventory (SSI)<br>Campus Climate construct | Develop and implement a comprehensive campus climate survey for students and employees of color  | Improvement shown in campus climate survey responses over previous survey<br><br>Statistically significant improvement in results of the SSI when compared to self in previous survey, as good or better results compared to SSI peer institution cohort |       |
| Objective 4.3: Spokane Falls Community College students develop awareness of diverse cultural perspectives.  |  |  |  |       |
| Indicators   | Evidence   | Actions  | Threshold  | Score |
| 4.3.1 SFCC will increase the number and rate of students who report that their experiences at SFCC have contributed to understanding people of other racial and ethnic backgrounds | CCSSE  | One of the two general education outcomes for assessment this year is diverse perspectives. The data will be analyzed summer 2015, shared fall 2015, and then the instructors will go through continuous improvement based on those results – revising curriculum, etc. in winter and spring 2016. Documentation of this cycle will provide qualitative data as well as evidence that professional development leads to improved student outcomes in core theme 1. | Statistically significant increase for CCSSE results compared to self in previous survey, as good or better results compared to CCSSE peer institution cohort  |       |

Figure 1.12: Core Theme 4 Objectives and Indicators

### Narrative

Objective 1, supporting diverse students’ success, had six indicators and eleven measures in the last assessment cycle. In revision, narrowing the achievement gap among the lowest and highest

performing groups is the focus. The College will benchmark against peer institutions as a measure of success.

Objective 2, inclusive culture, was based on opportunities the College provided to students and employees to create a more inclusive environment. In the revised objective, campus climate is measured. One flaw in this measure is that the voices of diverse students and employees can be lost on a predominately majority culture campus. Additionally, sample sizes of diverse students and employee respondents are often too small to provide valid and reliable results. SFCC will supplement the quantitative instrument with qualitative research including focus groups and unstructured interviews with targeted samples.

Objective 3, diverse awareness, was also marred by a focus on indicators of opportunities to engage diversity rather than whether those opportunities actually contributed to increased student understanding. Those indicators have been eliminated; the new objective focuses solely on students self-reporting their diverse awareness.

SFCC plans to clearly define the threshold for acceptable performance for each indicator early in the 2014-2015 academic year now that the objectives and indicators have been revised to clearly focus on measurable, meaningful outcomes where improvement is needed.

## Core Theme 5: Responsiveness to Community Needs

### Core Theme Description

Spokane Falls Community College meets the changing needs of its community stakeholders through collaboration and innovation.

| <b>Objective 5.1: SFCC will sustain and continue to build strong collaborative partnerships with business, community, government, education, and human services organizations throughout the region.</b> |   |   |  |        |
|--|---|---|--|--------|
| Indicators   | Evidence  | Actions   | Thresholds   | Scores |
| 5.1.1 SFCC will collaborate with community partners to provide multiple pathways to higher education for students of diverse abilities and needs.  | SAI, concurrent enrollment high school diplomas | Gateway to College, American Honors, I-BEST, Running Start, Passport, College in the High School, Early College High School | No significant achievement gap between students with diverse abilities and needs and general student population  |        |
| 5.1.2 SFCC will meet the regional employment needs for in-demand industries.   | EMSI, Advisory committee surveys                | Orthotics and Prosthetics Hope Grant,<br><br>Bachelor of Applied Science program development                                | EMSI results show number of college program graduates meet average growth of regional occupations in that career field<br><br>Advisory committee survey responses indicate adequate program response to community need |        |

**Objective 5.2: SFCC will advance service and engagement in the community.**

| Indicators   | Evidence   | Actions  | Thresholds  | Scores |
|--|--|--|---|--------|
| 5.2.1 SFCC will increase the number and rate of student and employee professional engagement in the community. | Advisory committee surveys, focus groups                   | Work study students, work based learning, clinical education   | Community input confirms college is increasingly improving in regards to community engagement |        |
| 5.2.2 SFCC will increase the number and the rate of student and employee civic service in the community.       | Advisory committee surveys, community partner focus groups | Service learning programs are in place with community partners | Community input confirms college is increasingly improving in regards to civic service        |        |

**Figure 1.13: Core Theme 5 Objectives and Indicators**

**Narrative**

SFCC meets the needs of its community stakeholders through collaboration and innovation. The College collaborates with partners in business, community service, government, and education organizations throughout the region to develop innovative programs and approaches, equitable educational pathways, and to provide civic service and professional engagement. The College assesses the success of these initiatives through a variety of measurements including completion rates, participation rates, surveys, and interviews.

Objectives 5.1 and 5.2, as they were addressed prior to the Comprehensive Year Seven Evaluation Report, focused primarily on inputs or programs offering an invitation for community participation. With the slight revision of the objectives, along with the leaning and fine tuning of indicators, the focus is now on the affect that such SFCC programs may have on the region, both culturally and as it impacts the area workforce of business and industry.

Core Theme 5 will engage with community members during the next academic year to establish realistic yet ambitious thresholds for its indicators of success in meeting its objectives.

## Conclusion to Year One Report

As stipulated by Standard One of the Northwest Commission on Colleges and Universities, the Year One Report has overviewed the mission and core themes of Spokane Falls Community College.

SFCC performs its role as one of two accredited colleges in Washington State Community College District 17. In collaboration with SFCC's sister college, Spokane Community College, SFCC collectively works toward fulfilling the District Strategic Priorities.

Through the continuous improvement process directed by assessment of its core themes—Excellent Teaching/Learning, Student Achievement, Broad Access, Diversity/Equity/Global Awareness, and Responsiveness to Community—SFCC is committed to fulfilling its mission. The SFCC Mission Statement guides the College's direction and purpose.

The College has been consistently engaged in course and program assessment for many years. With the recent reaffirmation and clarification of its five core themes, the College has been able to link its objectives to the strategic goals it uses to assess the effectiveness of its strategic plan. Many of the 23 indicators listed in the report under the objectives have already been in use, so tracking progress over time with regard to achieving the objectives has allowed the College the opportunity to evaluate and improve. The College was guided by the NWCCU Comprehensive Year Seven Evaluation Report to simplify and make more meaningful its use of indicators. As will be explained in the Addendum of this report, the College has engaged in a process that has vastly reduced its number of indicators while focusing those remaining on more meaningful measurements of student learning and institutional outcomes directly tied to its core theme objectives. The threshold for mission fulfillment has not been reached if a core theme has not been accomplished.

The indicators are assessable, verifiable, and provide meaningful results that inform our college faculty, staff, and student leadership of what is working well and what needs improvement. The themes, objectives, and indicators are indicative of the commitment that SFCC possesses in fulfilling its mission and purpose: to meet the needs of our community by advancing student achievement through quality, accessible learning opportunities that embrace diversity, promote equity, and foster global awareness. Everything the College does is for this purpose.

Given the direction of the mission statement and in meeting the NWCCU requirements for Standard One, the College has the framework in place to address Standards Two through Five as the College examines and develops resources and continues the process of planning, assessment, evaluation, revision, and implementation.

## **Appendices:**

### **Appendix A: Glossary of Acronyms and Terms**

CCS - Community Colleges of Spokane

CCSSE - Community College Survey of Student Engagement

CGRC – Curriculum and Graduation Requirements Committee

CTE – Career Technical Education

ELC – Early Learning Center

Kari Collen, Assistant to the Vice President of Learning, Curriculum Coordinator

Ken Commers, Business Management instructor, Faculty Development Committee Coordinator

Glen Cosby, Dean for Humanities Division, Business, Professional Studies, and Workforce  
Education Division; Core Theme 5 Lead

Chrissy Davis Jones, Associate Dean for Student Success, Counseling & Advising

Ira Gardner, Photography Program Lead, instructor, Curriculum and Graduations Requirement  
Committee Chair

Mary Ann Goodwin, CCS District Dean for eLearning

Janet Gullickson, SFCC President

Sally Jackson, Director of Planning, Institutional Effectiveness, and Research

Joe Jozwiak, Assistant Dean of Social Science, Accounting, Economics, and Human Services

Heather Keast, English Instructor, ITALIC Coordinator

Heather McKenzie-WaitE, Director of Student Funded Programs, Core Team 3 Co-Chair

Darren Pitcher, Vice President of Student Services, Core Theme 2 Chair

Lora Senf, Assistant Dean for Humanities, Business, Professional Studies, and Workforce  
Education, Core Theme 3 Co-chair

Barbara Simmons, English Instructor, ITALIC member

Carolyn Stephens, Visual Fine Arts Department Chair, Instructor, ITALIC member

Nancy Szofran, CCS District Provost/Chief Learning Officer

## **Appendix C: Core Theme Teams:**

### **Core Theme 1: Excellent Instruction/Learning**

**Jim Brady, Chair, Dean for Computing Math & Science Division, Social Science, Accounting, Economics, and Human Services Division**

Jared Anthony, English instructor, ITALIC member

Susan Brophy, Program Review Coordinator, Workforce Education

Ken Commers, Business Management instructor, Faculty Development Committee Coordinator

Kari Collen, Assistant to Vice President of Learning, Curriculum Coordinator

Brian Frederiksen, Research Analyst, Planning, Institutional Effectiveness, Research

Ira Gardner, Photography Program Lead, instructor, Curriculum and Graduation Requirements Committee Chair

Sally Jackson, Director of Planning, Institutional Effectiveness, Research

Miracle Jones, Associated Student Vice President of Activities

Joseph Jozwiak, Assistant Dean of Social Sciences, Accounting, Economics and Human Services

Jim Minkler, Vice President of Learning

Debra Olson, Math instructor, ITALIC member

Jan Wingenroth, Library Faculty

### **Core Theme 2: Student Achievement**

**Darren Pitcher, Chair, Vice President of Student Services**

Crystal Aguilar, Associated Student Academic Vice President

Adriana Bishop, Physical Science Chair, instructor

Ken Burrus, Athletic Director, Dean for Physical Education

Connie Carlson, Student Achievement Manager, Early Alert Co-Lead

Kari Collen, Asst. to Vice President of Learning, Curriculum Coordinator

Chrissy Davis Jones, Associate Dean for Student Development, Academic Consulting Team

Janet Gullickson, President

Tanja Huffman, Visual Applied Arts Department Chair, instructor, Academic Consulting Team

Sally Jackson, Director of Planning, Institutional Effectiveness, Research

Heather Keast, English instructor, ITALIC Coordinator, Academic Consulting Team

Laura Lee, Assistant to Vice President of Student Services

Jim Minkler, Vice President of Learning

Debra Olson, Math instructor, ITALIC member

Loren Pemberton, Counseling Department Co-Chair, counselor, Academic Consulting Team

Ping Ping, Sociology instructor, Diversity & Equity Committee, Faculty Development Committee

Cynthia Vigil, Counseling Department Co-Chair, counselor, Early Alert Co-Lead

### **Core Theme 3: Broad Access**

**Heather McKenzie, Co-Chair, Director of Student Activities**

**Lora Senf, Co-Chair, Assistant Dean for Humanities, Business, Professional Studies, and Work Force Ed**

Steve Bays, Associate Dean of Enrollment Services

Chrissy Davis Jones, Associate Dean for Student Development

Marjorie Davis, Director of Financial Aid

Julius DeFour, Academic Coach for Gateway to College Program

Mary Ann Goodwin, CCS District Dean for eLearning  
Debbie Hoyt, Testing Center Supervisor  
Sally Jackson, Director of Planning, Institutional Effectiveness, Research  
Angela Merrit, Manager of Disability Support Services  
Denise Osei, Counselor, Special Initiatives Early College High School, Diversity & Equity Committee

#### **Core Theme 4: Diversity, Equity, & Global Awareness**

##### **Bonnie Brunt, Chair, Dean for Visual and Performing Arts**

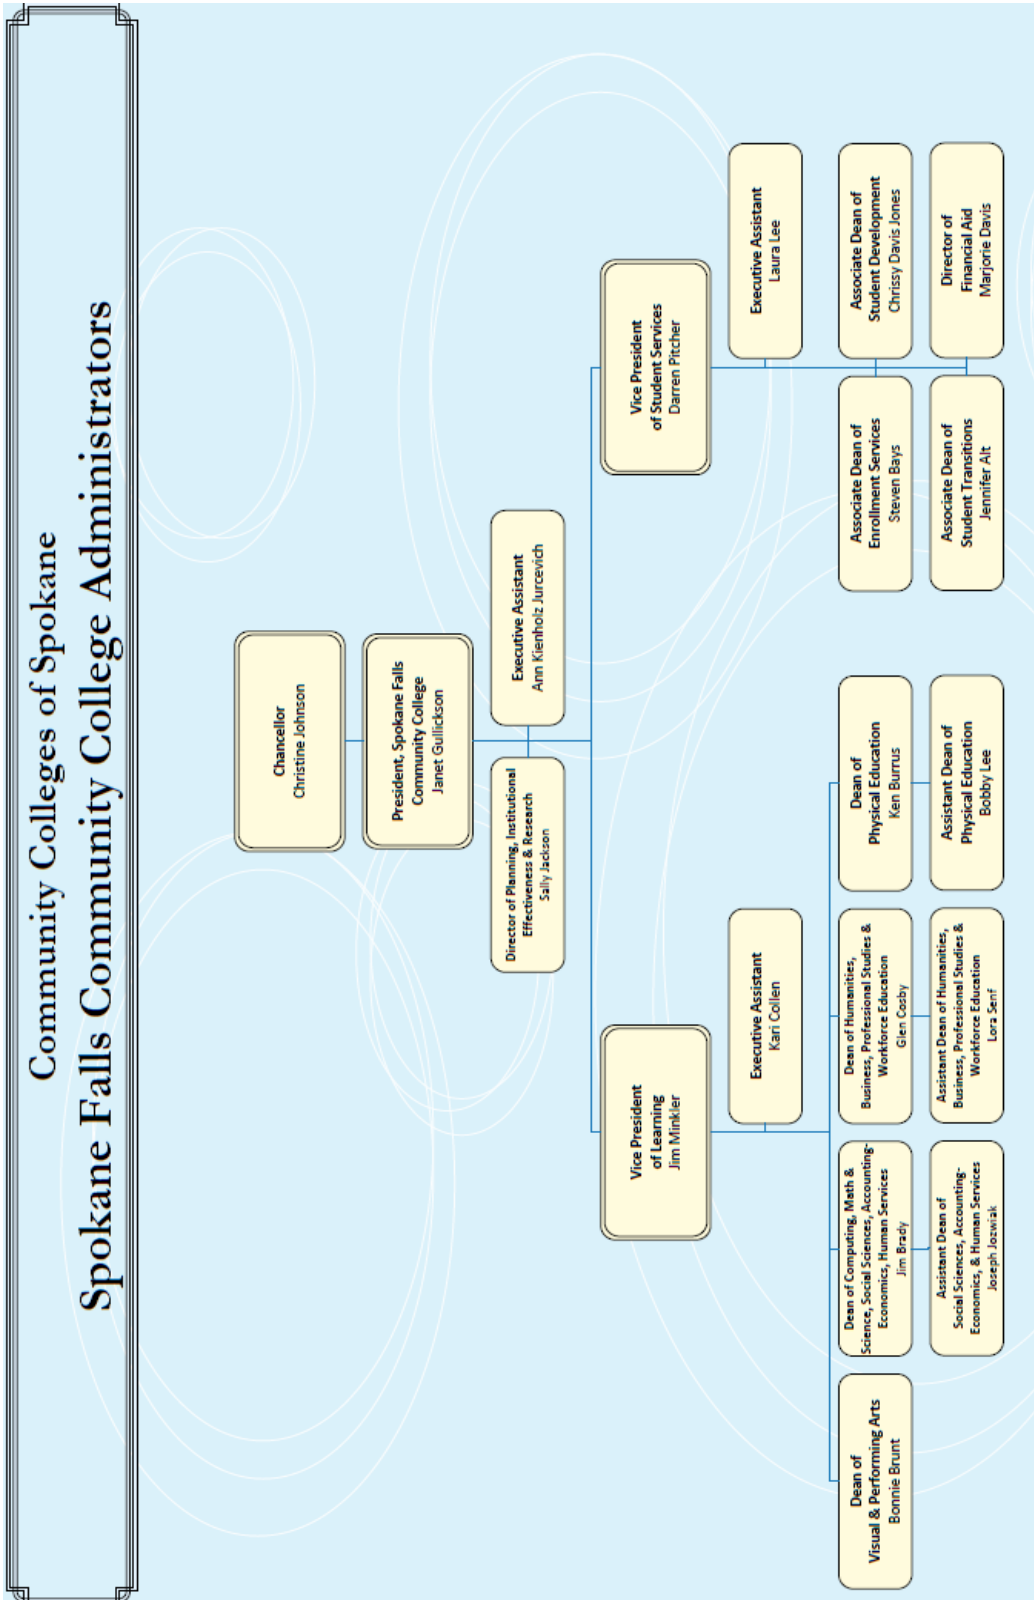

Christie Anderson, English Instructor, Diversity & Equity Committee  
Pam Austin, Multi-cultural Student Services Counselor, Diversity & Equity Committee  
Lisa Avery, Vice Provost for Strategic Partnerships, Global Education and American Honors  
Bradley Bleck, English Instructor, Chair of the Diversity Requirements Subcommittee  
Marti Breneman, Disability Support Services  
Anna Gonzales, Senior Secretary Fine Arts, Diversity & Equity Committee  
Elodie Goodman, French Instructor, Diversity & Equity Committee, Global Education Committee  
Sally Jackson, Director of Planning, Institutional Effectiveness, Research  
Heather Keast, English instructor, ITALIC Coordinator, Diversity & Equity Committee  
Carl Richardson, Art Instructor, Diversity & Equity Committee  
Darlene Rickett, Communication Instructor, Global Education Committee, Diversity & Equity Committee

#### **Core Theme 5: Responsiveness to Community Needs**

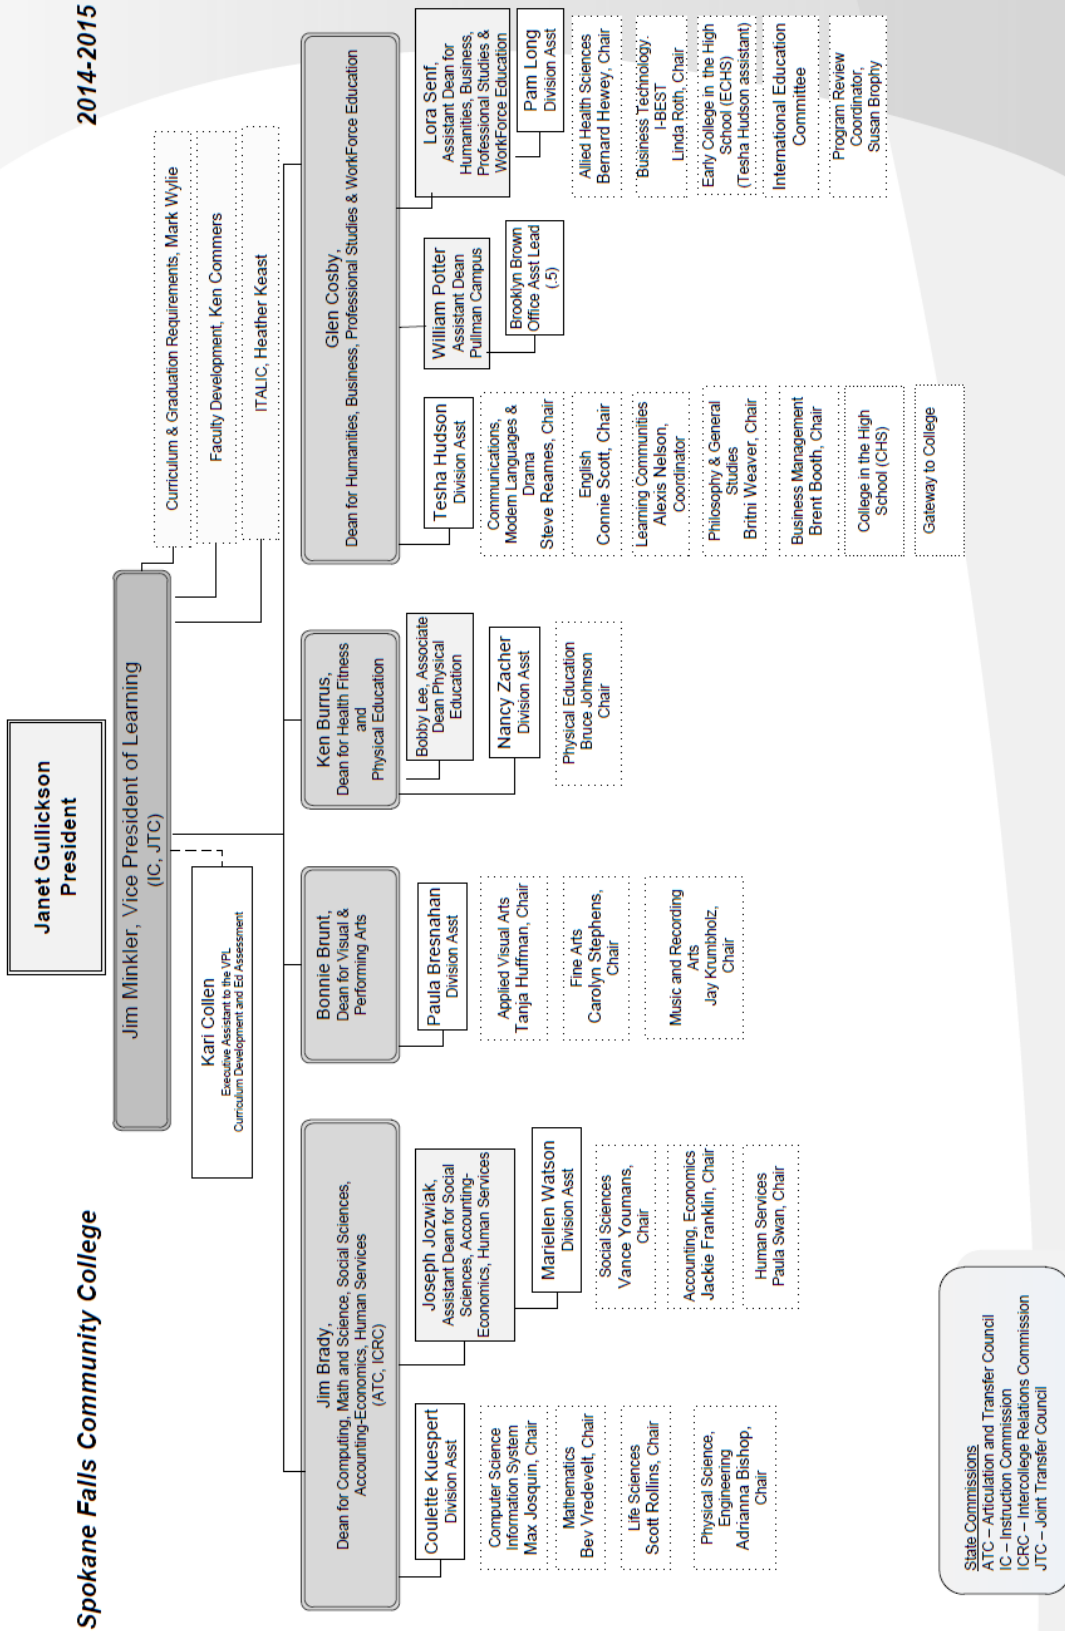

##### **Glen Cosby, Chair, Dean for Two Divisions**

Bonnie Brunt, Dean for Visual and Performing Arts  
Rob Crow, SFCC Director of Workforce Transitions  
Keith Klauss, Eastern Washington University Community College Liaison  
Joal Lee, Department Chair, English Instructor, Pullman Campus  
Darlene Rickett, Communication Instructor, Community Service and Service Learning  
Linda Roth, Department Chair for Business Technology, Instructor  
Lora Senf, Assistant Dean, Humanities, Professional Studies and Workforce Ed  
Sara Sexton-Johnson, CCS District Corporate Training Workforce and Continuing Education Director  
Tim Siebrecht, Associated Student Body Outreach Education  
Carolyn Stephens, Visual Fine Arts Department Chair, Instructor  
Nancy Szofran, CCS District Provost/Chief Learning Officer

## **ADDENDUM ADDRESSING RECOMMENDATIONS 1, 2, & 5**

### **RECOMMENDATION 1**

The evaluation committee recommends that the College articulate an acceptable threshold of mission fulfillment and ensure the effective measurement of core themes and that the core themes “individually manifest” and “collectively encompass” the College’s mission statement. Further the core theme objectives and verifiable indicators should be rigorous and meaningful, should align to evaluate the accomplishment of core themes, and should holistically inform evaluation of programs and services for each core theme objective (Standards 1.A.2, 1.B.2; 3.B.3; 4.A, and 4.B).

### **ACTION TAKEN IN RESPONSE TO RECOMMENDATION 1**

Since the receipt of the NWCCU reaffirmation of accreditation letter dated January 31, 2014, officially listing the five recommendations, the College has engaged in a fairly extensive overhaul but hopefully not a rushed one. Now that the accelerated timeline for the accreditation cycle is past and the NWCCU revised standard process can be fully utilized, the College hopes to utilize the normal timeline to be more thoughtful in designing its improvement process. Although the initial identification and approval of the five core themes grew out of a condensation of the various strategic planning goals the College had developed in its 2008-2013 Strategic Plan, the core themes were not an outgrowth of the former mission statement nor were all reflected in the mission statement. In that regard it was difficult to show how the core themes “individually manifest” and “collectively encompass” the College’s mission statement. It was the development of the core themes and their objectives that really exposed the previous mission statement as lacking.

SFCC President Gullickson wanted the entire college community to have the opportunity to engage in the conversation regarding mission revision. The approach provided some structure to the discussion. The Institutional Effectiveness Committee, previously the Executive Accreditation Committee, drafted several mission statements which encompassed the core themes, and solicited input on the drafts from the entire college community via an online survey. The input received was then analyzed and incorporated into the final drafting of the mission statement which was approved by the CCS Board of Trustees at its June 17, 2014 meeting.

The alignment of core themes with the mission addressed only one of several problems identified in Recommendation 1. Like many colleges adjusting to the new standards, the tendency to try to measure everything we value led the College down a road of complexity and challenges. Not all of the objectives were outcomes-based or critical to mission fulfillment, so the core teams identified essential outcomes which could be measured by “verifiable indicators,” would be “rigorous and meaningful,” and would inform the College as to whether acceptable thresholds were met and if not, provide the College the information needed to improve.

The core theme team process of revising objectives along with leaning the number of indicators was addressed in the body of the Year One Mission and Core Themes Self-Evaluation Report.

In order to assist the core theme teams in revising the objectives with verifiable and meaningful indicators, a review of other colleges yielded a number of examples depicting various templates used. After some customizing and synthesizing of two promising examples from other colleges, each core

theme team was provided a template whereby each indicator was followed by a column labeled “evidence”, then one labeled “action”, followed by columns for “threshold” and “score”. Although not all of these columns could be completed in Year One of the cycle, the intent was to ensure that all of the selected indicators will address the questions above. If the indicators pass that test and are reliable and valid measurements, the analysis of the data should allow core teams to accurately evaluate whether the objective is being accomplished. If not, the analysis informs the action plan for improving the College to improve and meet the acceptable threshold for that indicator.

More work remains for the core theme teams with regard to fine-tuning thresholds. Although much of that work will be informed by longitudinal evidence we already have been gathering, in some cases the data are lacking and hence need to be gathered before a more informed threshold can be set. Work will continue through the 2014-2015 Academic Year towards developing a clear understanding for all indicators of what constitutes exceeding expectations, what is acceptable, and what is not at an acceptable threshold.

## **RECOMMENDATION 2**

The evaluation committee recommends that the College revise its assessment of faculty evaluation and professional development to assure these processes provide ongoing systematic collection and analysis of meaningful, assessable, and verifiable data – quantitative and/or qualitative, as appropriate to its indicators of achievement – as the basis for evaluating the accomplishment of its core theme objectives (Standards 1.B.2; 3.B.3; 4.A.1, and 4.B.1).

## **ACTION TAKEN IN RESPONSE TO RECOMMENDATION 2**

Since SFCC's comprehensive ten-year peer-evaluation in 2003, the College has striven to provide several line item budgets specifically for faculty and staff development. Whereas most of these funds, traditionally, had a request process whereby the faculty member must provide a rationale regarding how the funding will benefit the College, none of the faculty development paperwork referred specifically referred to the core themes or core theme objectives. In addition, once the professional development was completed, in most cases, the faculty member was not required to show the outcome of the professional development with regard to how it may have impacted a core theme objective. For this reason, there has been a missing link in showing how the outcome of faculty professional development has accomplished a core theme objective; even though the assumption has been that it has done so.

Faculty evaluation procedures are addressed in the faculty master contract and cover evaluation of adjunct faculty, long-time serving adjunct faculty known as associate faculty, and annualized tenure and non-tenure track faculty. Although all of these categories of faculty receive evaluation through multiple indices that include student evaluations and classroom observation by a peer and/or supervisor, direct reference to core theme objectives has never been made in written evaluation documents and that linkage was not established through any of the core theme objective indicators until that linkage was made in Core Theme 1, [Objective 1.2, Indicator 1.2.1](#), of the Year One Report.

The Faculty Development Committee was charged by Core Theme 1 to address the linkage problems between professional development and the core theme objectives identified in Recommendation 2. The committee revised its faculty mini-grant application process which is now online where faculty members submitting proposals must address how the professional development activity will address one or more core theme objectives. Once the professional development activity is completed, faculty members are then required to complete the follow-up part of the form that addresses the outcome of the professional development and how it actually benefitted the core theme objectives ([see Exhibit A](#)).

In addition to the mini-grant application process, the Faculty Development Committee launched a new initiative during the 2013-2014 Academic Year called Teaching Squares. This peer, formative evaluation activity also has a follow-up assessment in which the participating faculty members provide feedback on how the activity benefitted core theme objectives, most notably Core Theme 1, Objective 1.2 ([See Exhibit B](#)).

The Faculty Professional Development 1K Fund application process was revised by the Vice President of Learning's Office. Faculty applying for use of their two-year cycle funding now must address how the professional development would impact core theme objectives and then follow-up similarly to what was developed by the Faculty Development Committee regarding the outcome of the professional development and how it would impact excellent instruction/learning ([see Exhibit C](#)).

The Sabbatical Leave Submission Guidelines, approved by the Deans & Chairs Council in December, 2005, stipulate that the faculty member address how the sabbatical will benefit the College, and more specifically, his or her instructional program. Upon returning from sabbatical, the faculty member is asked to submit a report and/or presentation about the sabbatical; thus, even before core themes were identified, sabbatical leave is linked to improved instruction and addresses Core Theme 1, Objective 1.2.

In the cases of faculty members or nonteaching staff whose supervisors have requested they engage in professional development, there is a direction connection between professional developmental and improvement that can now be documented. Often such requests are responses to a perceived need to improve the College in some way, either to address a shortcoming or to take advantage of a new opportunity that would benefit students. A recent example of this is the Achieving the Dream Grant, which has funded faculty and staff teams for three consecutive years to attend the National Academic Advising Association Summer Institute. At these workshops the SFCC team formulated action plans to revise academic advisement at SFCC in order to positively affect the outcomes of Core Theme 2, Objectives 2.1 and 2.2. Another example is training faculty over the last two years for prior learning assessment of portfolios to better serve experienced, nontraditional students, which addresses Core Theme 1, Objectives 1.2 and 2.2.

Reflective of the ideal, continuous improvement process, a substantial number of funded, faculty development activities have been a result of measuring student persistence, achievement, and satisfaction with support services. For example, the Office of Planning, Institutional Effectiveness, and Research has provided departments with data on the success rates for students in developmental math and English. With these rates falling well below the acceptable threshold of student success in these areas of pre-college education, Math and English Department instructors have attended a number of conferences and workshops to revise their curriculum and delivery methods. The results of these professional development efforts appear to be positively impacting student achievement, establishing the linkage between Core Theme 1, Excellent Instruction/Learning, and Core Theme 2, Student Achievement. With the revisions now made in requests for professional development funding and the follow-up reporting, the connections of professional development to the College's core theme objectives will now be obvious and well documented. Although not all linked to professional development, many of the new innovations the College embarked upon toward improving its core theme objectives did involve professional development, linked to specific core themes as can be seen in [Exhibit D](#).

Faculty and staff development workshops hosted on the SFCC campus and at the SFCC Pullman campus have also been well attended and offered as a result of analyzing data and concluding that action was needed to address unsatisfactory results in student achievement and satisfaction of services (SAI and CCSSE results). In Spring 2013 with the use of Achieving the Dream grant funding, Charlie Nutt, a nationally recognized expert on academic advising, presented to the SFCC Campus, and in Spring 2014, Wes Habley, another nationally recognized expert, presented on student retention. SFCC's previous method of measuring success of professional development workshops like these was to measure attendance. Given the guidance of our peer evaluators from the 2013 Comprehensive Seven Year visit, we now look at the intended outcomes of student achievement (using quantitative measures like the SAI) and student satisfaction with academic advising/consulting (using qualitative measures such as CCSSE and the Noel Levitz Survey of Student Involvement). These rigorous quantitative and qualitative measurements lead to an analysis that inform indicators 1.21, 2.1.1, 2.1.2, 2.2.1, and 2.2.3, which are "meaningful, assessable, and verifiable," and form "the basis for evaluating the accomplishment of its core theme objectives."

Through the recent revision of the core theme objectives and the fewer but more meaningful indicators of measuring the success in accomplishing those objectives, the College has made direct connections between how professional development and evaluation directly impact the core theme objectives. However, the core theme objective indicators may also inform what professional development is needed. An excellent example of that can be seen in the professional development activity the College

engaged in, June 2014, sending a team of faculty and administrators to Vermont to attend a workshop on general education assessment. As a result of receiving Recommendation 5, revising Core Theme Objective 1.1 and adding Indicator 1.1.2, the need for professional development in this area became apparent. Assessment of the core theme objectives is recursive in the continuous improvement loop, with one indicator of one objective informing the action needed for another objective.

Starting in January 2014 the Association of Higher Education (faculty union) and CCS Management began the process of reopening the faculty contract for interest-based bargaining after a five-year hiatus. Not uncommon to the process, the time-table for bargaining was supposed to be six months but now has overlapped into Fall 2014. At the time of this writing, the bargaining is not yet finished so no binding agreements have been made. Tentative agreements have been reached on parts, but a new contract has not been executed to supersede the previous contract. The issues of faculty evaluation assessment that will “provide ongoing systematic collection and analysis of meaningful, assessable, and verifiable data – quantitative and/or qualitative, as appropriate to its indicators of achievement – as the basis for evaluating the accomplishment of its core theme objectives” have been discussed, and with or without a change in the contract language it was agreed that supervisors have the discretion to discuss the evaluation in terms of meeting core theme objectives. The College now expects instructional deans to build this into the discussion with the faculty member under evaluation, informing indicator 1.2.1 and the action plan connected to that indicator. More importantly, faculty members will receive important feedback with regard to how their teaching can help the College achieve its core theme objectives and fulfill its mission. As part of the evaluation process, if the faculty member is found in need of improvement with regard to Core Theme 1, the appropriate professional development relevant to that area will be recommended and documented as part of the official evaluation process.

## **RECOMMENDATION 5**

The evaluation committee recommends that the College move aggressively to revise and refine its system of direct and authentic assessment that appraises student accomplishment of general education outcomes from which are derived meaningful results that provide clear direction for curricular and instructional improvement (Standard 4.A.3, 4.A.6, 4.B.1, and 4.B.2).

## **ACTION TAKEN IN RESPONSE TO RECOMMENDATION 5**

SFCC adopted an assessment method of measuring general education outcomes for transfer degrees by distribution area twelve years ago. It treated transfer degrees as an entire program, and since all the transfer degrees shared the same distribution areas, by assessing the general learning outcomes of the six distribution areas, all areas of each transfer degree would be covered. As the Fall 2013 NWCCU peer evaluation team discovered, the approach seemed to be working in only one of the six distribution areas, Humanities. The team was not able to find evidence that the assessment in the other five distribution areas was an “authentic assessment that appraises student accomplishment of general education outcomes from which are derived meaningful results that provide clear direction for curricular and instructional improvement.”

In the case of Recommendation 5, it was not simply a matter of the College not providing the documents of the general education assessment. For some time faculty members had found the distribution area general education outcome assessments challenging, particularly those that crossed diverse disciplines. The default seemed to be to identify a measurement that was easy to do, rather than take on the challenge of finding one which was meaningful for instructors in improving instruction.

Results of the assessments in most cases, were not used to inform much less improve general education curriculum offerings. Although the process could have been revised to imitate the Humanities process, another challenge made that approach unworkable. The College had assumed for the dozen years of the general education assessment process that the sum of the distribution area parts was equal to the whole of the degree. However, there were so many possible general education learning outcomes once all the distribution areas were added together, that it was too cumbersome and complex to assess the program as a whole in a meaningful way. Given these challenges, SFCC has taken the bold step and abandoned its distribution area assessment. At the urging of President Gullickson, some colleges recognized for best practices in general education assessment were researched, and the obvious trend that seemed to emerge from this research is that by limiting the number of general education outcomes to a few meaningful, comprehensive, and verifiable degree learning outcomes, a more meaningful and actionable result was possible.

After researching the recent literature on general education assessment, the Institutional Teaching and Learning Improvement Committee (ITALIC), composed of faculty representatives from across the disciplines in both transfer and career/technical education, examined some models that were recognized as best practices. For the associate transfer degrees, identifying the desirable general education learning outcomes of the first two years of a baccalaureate education made a great deal of sense. ITALIC focused on research throughout the winter and spring quarters of 2013-2014 and identified key, overarching general education learning outcomes of the SFCC transfer degrees. In June 2014, the College sent an SFCC team to the Association of American Colleges and Universities' Institute on General Education and Assessment which was held at the University of Vermont. After a week of work, the team was able to return with a work plan to develop and implement SFCC's new approach to general education assessment. The plan also includes career technical faculty and the assessment of related general education instruction required in their certificates and degrees. Replacing the 19 general education learning outcomes of the distribution areas are now five general education learning outcomes for the transfer degrees:

1. Communication
2. Critical and Creative Thinking
3. Diverse Perspectives
4. Information Literacy
5. Quantitative Literacy

As President Gullickson directed ITALIC to assess two of the outcomes in 2014-2015, ITALIC chose Communication and Diverse Perspectives to be the first two assessed since the course mapping seemed to be clearest for these two and thus would allow SFCC to start quickly using already-developed and nationally-normed rubrics from AAC&U called the VALUES rubrics ([see Exhibits E & F](#)). These outcome maps will be sent to the Deans & Chairs Council in early Fall 2014 to gather input. The three remaining outcomes will be assessed in Winter 2016, also using VALUES rubrics. Two groups of faculty, from all appropriate disciplines, will be involved in the assessment process, one group to design and collect student assignments and one group to assess the assignments using the rubrics. The academic year 2014-2015 is the first year to test the process and will not provide a complete vision of final implementation.

Continuous improvement will occur in the outcomes' "off" year. For example, while three new outcomes will be assessed in 2015-16, instructors mapped to the first two, Communication and Diverse Perspectives will spend the year redesigning their assignments and curriculum as needed based on the

results of the previous year's assessment. As the first cycle of assessments is completed, this continuous improvement cycle will further inform the need to adjust the outcomes, rubrics, or thresholds. At the time of this writing, there still is much work to do, but with a paradigmatic shift in how general education assessment is done at SFCC, a process whereby all academic and career/technical programs can be involved is paramount to the success of the revision. The ultimate plan for general education assessment is that the analyzed results of Indicator 1.1.2 will help the College attain Objective 1.1, which in turn will further the College's ability to attain Objectives 1.2 and 1.3 to assure excellence in teaching and learning.

## EXHIBIT A

### Faculty Development (FD) Mini-Grant Application

(Revised December 2013)

This application is to request both **Professional Development** AND **Assessment Related** funds via the **Faculty Development (FD) Committee** for conferences, training, travel, projects, etc. See "**Guidelines for Faculty Mini-Grant Proposals**" **prior** to completing this application. It provides specific details regarding funding limits and how they may be used. The FD website also has a spreadsheet listing the past mini-grants awarded to include dollar amounts. The quarterly deadline for applications is strictly upheld.

**Fill in All Gray Highlighted Areas:** (use the Tab key or Mouse to move to the next field)

\*NOTE: EVERYONE must complete 1-4; then, if you are requesting FD funds also answer #5; and/or if you are requesting Assessment Related funds, you must also complete 6 and 7.

Funds Type Requested:  **Professional Development** &/OR  **Assessment Related**

Name:                      Quarter of Request:                      Year:

**Professional Development Funds Requested:** \$                      (\$600 max from Sum 2012–Spr 2014)

**Assessment Related Funds Requested:**                      \$                      (\$600 max from Sum 2012–Spr 2014)

1. **ALL**-Describe your proposal: (WHAT will you do with the funds requested? WHERE is the activity or event taking place?)
2. **ALL**-What are the specific dates of your activity?
3. **ALL**-How will you share the results of your project? (ex. brown bag, newsletter, presentation, dept. meeting, etc.)
4. **ALL**-If other faculty are involved list names: (Each faculty member requesting funds MUST submit a separate Application.)
5. **PD ONLY**-How will this project contribute to your improvement/enhancement of teaching, learning, and/or professional development?
6. **ASMT ONLY**-Is your conference/event primarily about educational assessment or ways to measure the achievement of learning outcomes? Please provide details.
7. **ASMT ONLY**-What is your assessment project and how will this funding help you complete the project?

Please itemize the budget as accurately as possible regardless of the requested amount. (FYI-entries in sections a-d also require a TPA to be completed.)

|                   |    |
|-------------------|----|
| a) Registration   | \$ |
| b) Transportation | \$ |
| c) Lodging        | \$ |
| d) Meals          | \$ |
| e) Materials      | \$ |
| f) Other          | \$ |
| <hr/>             |    |
| TOTAL             | \$ |

If applicable, list other sources of funding to be used: ([1K funds](#), department, other awards, mini-grants and/or personal expense)

**SUBMITTING YOUR APPLICATION AND COMPLETING THE PROCESS:**

**--- for the Faculty Development Committee: (submit one item)**

- Complete the online Mini-Grant Application and Save (“Last, First Name-application”)
- E-Mail the Mini-Grant Application to the FD Chair at [ken.commers@spokanefalls.edu](mailto:ken.commers@spokanefalls.edu) by 4PM on the mini-grant deadline to be considered for that quarters funding**
- FD only wants your Application, NOT such things as your TPA, 1K requests, etc.

**--- for the Vice-President of Learning’s Office: (submit complete packet)**

- A copy of your Mini-Grant Application
- 1K Fund Application with required signatures (only if 1K Funds are being requested)
- TPA (Travel Prior Approval) if activity requires travel, registration, lodging or meals
  - o TPAs should be completed by and/or routed through your dept. admin or senior secretary and identify budget #s
  - o FD Mini-Grant: 011-3G51 / 1K Fund: 111-32B4 / & your dept. budget # if applicable
  - o Travel must be through State approved agency: Global Travel 891-1234 or Azumano

**WHAT NEXT:**

The FD committee will meet within 10 working days of the quarterly deadline to discuss the applications. FD will report back results to all applicants within 5 working days.

### Spokane Falls Community College TEACHING SQUARES REFLECTION

---

1. a. Last name  1.b. First name
2. SID (for stipend)  3. Quarter  Year: 20
3. Your e-mail (to receive acknowledgement)
4. Teaching / Subject Area:  5. Instructor Status:
6. Name of the other instructors in your group
7. Have you completed all of your teaching observations?
8. Have you completed your final group meeting?
9. What have you learned about your teaching philosophy from the classroom observations? (Could be something new, something affirmed, etc.)
10. How has the experience of being in the "learner" role impacted how you think about your teaching?
11. What have you learned are your teaching strengths?
12. What words would your students use to describe you (funny, tough, fair, etc.)? How would students describe your classes?
13. What aspects of your teaching do you wish to improve - and how might you do this?
14. What surprised you about the experience? Were any of your assumptions about teaching challenged by what you observed?
15. What is something(s) you learned that will make your teaching more effective? What will you be able to apply to your classroom next quarter?
16. Which of the following SFCC Core Themes will be positively impacted by your participation?  
\*\*For each one selected, briefly describe/explain how.
- I – Excellent Instruction/Learning
  - II – Student Achievement
  - III – Broad Access
  - IV – Diversity, Equity, Global Awareness
  - V – Responsiveness to Community Needs
17. Any additional thoughts, concerns, ideas for improving the program, etc.?
18. May we use your comments to share information regarding the program?
- YES, you may use my name and comments
  - YES, you may use my comments, but only anonymously
  - NO, you may not use my comments

To enable "Submit" button, make sure to complete all questions but #13, as it is optional.

## EXHIBIT D

July 7, 2014 [NEW INNOVATION COSTS FOR 2013-2014 ACADEMIC YEAR]

| INNOVATION  | DESCRIPTION OF COST FACTORS  | COSTS  | CORE THEME |
|---|--|--|------------|
| ACADEMIC CONSULTING   | Third year in row SFCC sends large team to NACADA for week long training on academic advising. This year was in Portland. Brought Wes Habley to SFCC for in-house training.  | Covered by the Achieving the Dream grant   | 1,2        |
|   | For the second year in a row, SFCC has covered the cost for adjunct faculty to participate in academic consulting, including any related professional development opportunities.   |  |            |
| ACCELERATED DEVELOPMENTAL MATH  | Release time for two math faculty to develop Math 87 and 88 series, condensing three quarter sequence to two and providing non-calculus pathway for students.  | \$10,000 AH replacement costs with benefits, \$5,000 from Project Degree grant for revisions in placement testing  | 1,2        |
| ACCELERATED DEVELOPMENTAL ENGLISH   | Sent team to Baltimore for specialized training in how to accelerate developmental English, already had 99 Plus pathway combining two quarter sequence to one quarter. Deliverable will be other accelerated pathways including bridge from developmental to English 101 completion all within same quarter. | \$8,056 for faculty training via Baltimore trip and registration.  | 1,2        |
| ADJUNCT FACULTY INCLUSION   | Adjunct faculty paid a \$50 stipend for attendance at all –college and special adjunct/administrator meetings. Recommendation to do so from MDRC studies.  | \$5,700 of stipends paid to adjunct faculty.   | 1          |
| AMERICAN HONORS COLLEGE   | Curriculum is revised to meet the honors criteria, specific sections are created and faculty hired to teach the sections and AHC offers enhanced student support services.   | Costs are to be covered by American Honors College   | 1,2        |
| BACHELOR OF APPLIED SCIENCE DEGREE APPLIED MANAGEMENT                                       | Travel to statewide meetings and personnel time to research and develop first phase of proposal.   | \$500 ½ of travel to attend statewide meetings w/ BAS work group   | 2,3,5      |
| BACHELOR OF APPLIED SCIENCE DEGREE INFORMATION SYSTEMS / TECHNOLOGY                         | Travel to statewide meetings and personnel time to research and develop first phase of proposal.   | \$500 ½ of travel to attend statewide meetings w/ BAS work group   | 2,3,5      |
| BACHELOR OF SCIENCE INTERACTIVE DESIGN & DEVELOPMENT CHANGED TO 2 + 2 ARTICULATION WITH EWU | Release time to develop the BAS proposal and then the articulation with EWU.   | \$5,000 for AH replacement costs with benefits   | 2,3,5      |
| CAREER NAVIGATOR  | Career Navigator develops a professional network for students in their career field through outreach within SFCC and out in the community. The students develop projects to bring what they have learned back to other students and SFCC faculty and staff.  | Paid for through Work First funds.   | 2,3,5      |

### Diverse Perspectives Rubric

(Adapted from Global Learning and Intercultural Knowledge and Competence VALUE Rubrics)

Diverse Perspectives is a critical analysis of and an engagement with domestic and global diversity across a spectrum of differences, as well as implications for people's lives. Through Diverse Perspectives, students should 1) become informed, open-minded, and responsible people who are attentive to diversity, 2) seek to understand how their actions affect both local and global communities, and 3) address diversity issues collaboratively and equitably.

Evaluators are encouraged to assign a zero to any work sample or collection of work that does not meet cell one level performance.

|                           | <b>4</b>  | <b>3</b>   | <b>2</b>  | <b>1</b>   |
|---------------------------|---|--|---|--|
| <b>Attitudes</b>          | Seeks out answers to deeper questions about other cultures.   | Asks deeper questions about other cultures.  | Asks simple questions about other cultures.   | States minimal interest in learning more about other cultures.   |
| <b>Perspective Taking</b> | Evaluates and applies diverse perspectives to complex subjects in the face of multiple and even conflicting positions.  | Evaluates and applies diverse perspectives to complex subjects.  | Identifies and explains multiple perspectives when exploring subjects.  | Identifies multiple perspectives while maintaining a value preference for own positioning.                               |
| <b>Knowledge</b>          | Analyzes substantial connections between the worldviews, power structures, and experiences of multiple cultures historically or in contemporary contexts.   | Analyzes simple connections between worldviews, power structures, and experiences of multiple cultures historically or in contemporary contexts. | Explains and connects two or more cultures historically or in contemporary contexts, demonstrating some openness to varied cultures and worldviews. | Describes the experiences of others historically or in contemporary contexts primarily through one cultural perspective. |
| <b>Application</b>        | Applies knowledge and skills to implement sophisticated, appropriate, and workable solutions to address complex solutions to global or domestic diversity challenges using multiple perspectives. | Plans and evaluates more complex solutions to global or domestic diversity challenges using multiple perspectives.                               | Formulates practical yet elementary solutions to global or domestic diversity challenges that use at least two perspectives.                        | Defines global or domestic diversity challenges in basic ways, including a limited number of perspectives and solutions. |
